

Robot researchers required

Project Title	Robot researchers required
Project Summary	Find existing Wikipedia Bots that could be brought over to Powerpedia's DOE internal wiki, testing them, and (depending on your skillset) creating new ones to meet customer requests
Country	United States

Project Description

Powerpedia is a non-public, employee created encyclopedia of information about the Department of Energy (DOE). It uses the same technology that powers Wikipedia (Mediawiki) and can be accessed and edited by any DOE employee or contractor. Powerpedia's mission is to help employees share information on topics while improving communication and coordination between DOE organizations.

It is solely for authorized internal use by Department of Energy employees and contractors working at DOE headquarters and field sites. Any DOE employee or contractor working in DOE headquarters or at a DOE field site can view and search the Powerpedia wiki. This project is partly inspired by Intellipedia, a Wikipedia-like intelligence database.

Required Skills or Interests

Skill(s)
Coding
Design thinking
Research

Additional Information

Wikipedia's bots (<https://en.wikipedia.org/wiki/Wikipedia:Bots>) are an automated tools that carries out repetitive and mundane tasks to maintain the 47,798,470 pages of the English Wikipedia. There are currently

2,304 bot tasks approved for use on the English Wikipedia. We would like to explore using some of them to help automate some editing on Powerpedia.

Language Requirements
